

# RAPIDORDER APP

## INCREASE YOUR CUSTOMER RETENTION

- ✓ Increase your sales and empower your customer
- ✓ Easy to use & designed to the point

- ✓ It's your additional sales channel that integrates seamlessly

### ► EASE (RE)ORDERING OF YOUR PRODUCTS

Increase your sales: Allow your customers to order and reorder your products with minimal effort and wherever they need them. They scan a product barcode, select the amount and place the order. The interface is optimized for use in warehouses, workshops & heavy environments.

### ► LET MULTIPLE BARCODES/QR-CODES POINT TO YOUR PRODUCTS

Any code your customers scan, leads to you: Customers may scan any barcode to get to your product portfolio. Create custom QR codes from your administration interface or let them retrieve your products by any EAN/UPC/ISBN pointing to your portfolio. They can also link their inventory barcodes to your products. During enrollment we make sure all standard codes are linked to your product portfolio.

### ► DELIVER PARTS TO THE FINAL ASSEMBLY LINE OR INTERNAL RECIPIENT

Increase the customer loyalty and ease the internal delivery of your delivery: Provide product barcodes that store the final delivery location (warehouse, project code, etc.) or project information. Label your shipment with the correct destination to support the distribution of incoming goods for your customer.

### ► YOUR START INTO THE INTERNET OF THINGS, INDUSTRY 4.0 AND SMART PRODUCTION

Add value and shape the digitalization of your customer's: Improve your customers internal order management. Our app brings approval workflows and a customer front-end to manage app orders that purchasers love. The modern backend provides interfaces for automated ordering (M2M / IoT).

### WHY CHOOSE OUR SOLUTION?

- ✓ **Your Brand - Your App Style:**  
The 100% White Label Order app looks just like your business.
- ✓ **Add a unique touch** with custom app extensions easily:
